Class 6	Ships
Class 12	Liability for ships

To the best of the knowledge of the present directors and management the Company has never written any policies in the above authorisation classes.

2007 Particulars of Material Counterparty Transactions

A fellow subsidiary, DL Insurance Services Limited, provides staff/administration services to the Company. During the course of 2015, an amount of £879,868k recharged to the Company by DL Insurance Services Limited. The amount outstanding at the year end was £79,679k.

2101 Change in Product categorisation

The product Car Hire - Enhanced Courtesy Car has been reported in category 180 "Total primary (direct) and facultative personal lines financial in this year's return as it was incorrectly classified in category 120 - "Total primary (direct) and facultative personal lines motor business in last year's return.

2102 Provision for Unearned Premium

The provision for unearned premiums accounted on an accident year basis is calculated using the 24ths method. This method is employed as being the most accurate possible given the Company's data and existing systems.

2202 Claims Management Expenses

The costs of administering claims are specifically identified within the Company's costing system and these, together with the appropriate share of support costs, make up the claims handling costs stated in the Return. Claims handling expenses are carried forward based on an estimate of the likely costs to be incurred in settling all outstanding claims.

2204 & *2406* Acquisition Costs

Statement in accordance with the Return

Name of Company **U K Insurance Limited**

Financial year ended **31st December 2015**

The costs of acquiring business are specifically identified within the Company's costing system and these, together with the appropriate share of support costs, make up the non commission acquisition costs stated in the Return. Such acquisition costs are carried forward as a percentage of unearned premiums, derived as the ratio of non commission acquisition costs incurred to gross premiums written.

The business reported in form 24 ceased writing new businesses in 2003, and no further acquisition costs have been incurred. There is no deferred acquisition cost in relation to this business.

2205 Unexpired Risk Reserve

In setting an unexpired risk reserve the Company offsets surpluses in one class of business against deficits in other classes within the same business segment on the grounds that all business classes within each business segment are managed together. In setting the reserve, investment income with assumed return derived from the Lloyd's yield curve (with a volatility adjustment) taken into consideration. A provision of £nil was required at 31 December 2015(2014: £nil).

2402 Underwriting Year Accounting

The Company's policy is to adopt accident year accounting for all business with the exception of business which it categorises internally as "Special Risks". These Special Risks schemes are in run-off and predominantly represented extended warranty business. The Company considers that underwriting year accounting is more appropriate than accident year accounting as it better reflects the nature of the business written, covering an extended number of years on which early determination of profits is neither appropriate nor possible.

2404 Claims Management Expenses

The cost of administering claims for business accounted for on an underwriting business (Special Risks) is included within commissions payable to the administrators/introducers of this business and is therefore not disclosed separately as claims management costs.

2501 Provision for Unearned Premium

Previously, the provision for unearned premiums accounted on an underwriting year basis was calculated using the 24ths method, modified to reflect the actual duration of policies in force measured in months. This method was considered to be the most appropriate for business which was ceded to the Company in blocks, normally on monthly bordereaux, by the agents selling the policies.

During 2003, the Special Risks business was put into run-off. Future levels of premiums, their earnings profile and claims were linked but subject to particular uncertainty. This business was consequently reserved on an ultimate result basis. Premium and associated acquisition costs are deemed to be fully earned and a single reserve for claims, net of future premium movements but gross of reinsurance has been established.

3001 & *3003* Discounting

An adjustment for discounting has been made in the following categories;

Private motor – Comprehensive (121)

Commercial Motor – (220)

Commercial Liability – (270)

The expected yield used in Form 30 is the annualised interest received on a non-compounding basis, divided by the current FV of the assets.

The method used in calculating the deduction for discounting is based on the projection of expected claims cash payments including outstanding claims and IBNR. Undiscounted cash flows are derived from the expected terms of the settlements, the assumed life expectancies, allowance for future inflation and are adjusted for the inflation agreed in the settlements. The effect of discounting is calculated as the difference between undiscounted value of these cash flows and the present value at the time of settlement or valuation date (whichever is later) of these cash flows arising using a discount rate of interest.

The rate of interest used in the discounting calculations is 4.0%.

For settled claims that are discounted, the average assumed remaining life expectancy at the end of the financial year is 44 years.

The criteria adopted for estimating the period that will elapse before claims are settled are: for each claim this is calculated as the mean of the insurer's and the claimant's expert advice on the claimant's life expectancy.
